

NUVEPRO TIMES

September Newsletter

Thought of the Month:

"The only way to do great work is to love what you do."

— Steve Jobs

Let this serve as a reminder to follow your passion, for that is where true success lies.

**Word of the Month: **

Quixotic

Meaning: Extremely idealistic, unrealistic, or impractical, especially in the pursuit of ideals or goals.

Use in a sentence: Her quixotic quest to change the world inspired many, even though it seemed impossible.

Fun Facts You Didn't Know:

- **Bananas are berries, but strawberries are not!**
Botanically speaking, bananas are classified as berries, while strawberries belong to a different category.
- **Humans share 60% of their DNA with bananas.** As strange as it sounds, this demonstrates just how interconnected all living organisms are.
- **There's enough gold in Earth's core to cover the planet's surface.** If we could somehow extract it, each square meter of the Earth's surface could be covered in a 1.5-meter-thick layer of gold!
- **Sharks existed before trees.** Sharks have roamed the oceans for more than 400 million years, whereas trees only appeared around 350 million years ago.

WE ARE HIRING!

- Understanding of SDLC and Test Life cycles is a must

Job Specification

Qualification : Any Graduate / Diploma holder in Engineering disciplines

Growing with Innovation: My Journey at Nuvepro

Hello all! I am Priya G, B.E. in Electronics and Communication Engineering, currently interning as a Software Developer at Nuvepro Technologies Pvt. Ltd. since May 2, 2024. I have had the privilege of working with a talented and supportive team, who have consistently encouraged my growth and learning. During my time here, I have gained hands-on experience with technologies such as Spring Boot, Spring MVC, Spring Security, JUnit, Mockito, Restful APIs, database management (MySQL), and version control (Git). The collaborative environment has helped me develop a strong understanding of software development. I am grateful for the opportunity to contribute to real-world projects while continuously enhancing my technical skills. This experience has been invaluable, and I sincerely appreciate the guidance and support provided by everyone on the team.

Priya G

Intern - Experiential learning

Entwined in purpose, steadfast comrades stand,
One leading the charge, the other a supporting hand.
Diverse roles converge in friendship's steady flow,
Where visionaries dream as anchors forge the path to go.
Yet even cherished amity can bear toxic seeds,
When imbalances fester and care falls to bitter weeds.
The occupied soul may turn blind eye on the other,
Ambition eclipsing the vow of loyalty like brother to brother.
Not all busy friends ignore, but drift they sometimes must,
Lest ties long nurtured wither to cracking rust.
In tempering expectations, wisdom lies to uphold,
friendship's essence, more precious than rusting gold.

My Experience joining Nuvepro as an Intern

I recently had the exciting opportunity to join a dynamic and innovative company called Nuvepro Technologies. As I embarked on my new journey, I was filled with anticipation and eagerness to explore the world of this emerging organisation. From the moment I walked through the doors on my first day, I could sense the vibrant energy that permeated the office.

Nuvepro Technologies specializes in building hands-on labs for students and working professionals, providing them with practical experiences in various technological domains. This aspect of the company's work resonated deeply with me as someone passionate about learning and technology.

To ensure a smooth transition into the company, Nuvepro had a well-structured induction program in place. The program began with a warm welcome by the HR team, who introduced me to the company's culture, values, and mission. They took the time to explain the organizational structure, the different departments, and the key people I would be working with.

Throughout the first few days, I had the opportunity to meet with various teams and individuals who graciously took the time to share their knowledge and experiences.

They explained Nuvepro's products and services in detail, showcasing how the hands-on labs they developed helped individuals gain practical skills in a wide range of disciplines. It was inspiring to witness the team's dedication to empowering learners and professionals through innovative learning solutions.

Not only were the people at Nuvepro incredibly knowledgeable and skilled, but they were also genuinely kind and welcoming. Everyone I interacted with went out of their way to make me feel comfortable and valued as a new member of the team. They patiently answered my questions, shared insights into their roles, and offered guidance whenever I needed it. The collaborative and supportive environment fostered a sense of belonging from the very beginning.

As the induction program progressed, I was assigned a mentor who acted as my guide throughout my initial days in the company. My mentor was an experienced professional who provided valuable insights into the nuances of the organization and offered advice on how to navigate the various projects and tasks I would undertake. Their guidance played a crucial role in helping me acclimate to the company's workflows and processes.

Overall, my experience of starting at Nuvepro Technologies was nothing short of exceptional. The combination of a well-structured induction program, knowledgeable colleagues, and a genuine culture of support made me feel confident and motivated from the outset. I am eager to contribute my skills and ideas to the company's mission of revolutionizing practical learning, and I look forward to the exciting journey ahead with Nuvepro Technologies.

Intern - Engineering

Embracing Strategy in EdTech: My Journey at Nuvepro

Since joining Nuvepro , as the Sales Director in the EdTech segment, I've come to appreciate how personal interests can influence professional success. My passion for chess has profoundly shaped my approach to business. The game requires strategic thinking, foresight, and adaptability—qualities that are essential in the ever-evolving EdTech landscape.

At Nuvepro, we provide hands-on labs, guided project labs, and assessments tailored to meet the diverse needs of our clients, whether they are B2B partners or B2C learners. Just as a chess player anticipates their opponent's moves, we proactively address our clients' training requirements, from instructor-led training companions to skill verification for promotions.

One of the most rewarding aspects of my role has been witnessing the transformation of our learners. Whether assisting fresh graduates in their first job or helping seasoned professionals upskill, our training solutions make a significant impact. Our labs offer essential practice opportunities, enabling learners to apply their knowledge in real-world scenarios.

As I continue my journey at Nuvepro, I'm excited to embrace new challenges and innovate training solutions that empower learners and businesses alike. With a commitment to excellence, I look forward to shaping the future of corporate training and making a lasting impact in the EdTech space.

A Transformative Experience: My Time at Nuvepro

Hello, Prateeksha here! I am a newbie @Nuvepro and I'll be sharing updates on my projects, what I'm learning, and a bit about my hobbies. Let's dive in!

I've been focusing on several enhancements in Moodle. I've implemented new configurations to streamline user experiences and improve system functionality. Additionally, I've created a feature that allows existing users to have labs pre-created, saving them time and enhancing their overall experience. I also developed a hide/show functionality to dynamically display results, ensuring that end users only see relevant information. To make it easier for users to access and analyze data, I've enabled options to downloading reports tables. Furthermore, I've been enhancing SQL query building in PHP, which has significantly streamlined database interactions; this project was both challenging and rewarding!

When I'm not working, I enjoy spending my free time crocheting and watching K-dramas. Crocheting allows me to relax and be creative, while K-dramas provide an enjoyable escape with their captivating stories and characters.

From New Beginnings to New Skills: My Journey at Nuvepro Technologies

Hi, I am Pavani Rodda. I graduated with a B.Com in Computer Applications. My hobbies include traveling, listening to music, and learning new things. I'm excited to share my experience at Nuvepro Technologies. I joined on July 10th, 2024, and it has been a great opportunity for me. I've learned so many new skills, especially in coding. My team members have been incredibly friendly and supportive, always willing to help whenever I face challenges. They never pressure me to overwork, which creates a comfortable environment. This experience has been invaluable in helping me achieve my goals.
